The transition to two – Jetstream to Jetstream2

David Y. Hancock – Indiana University

Director for Advanced Cyberinfrastructure

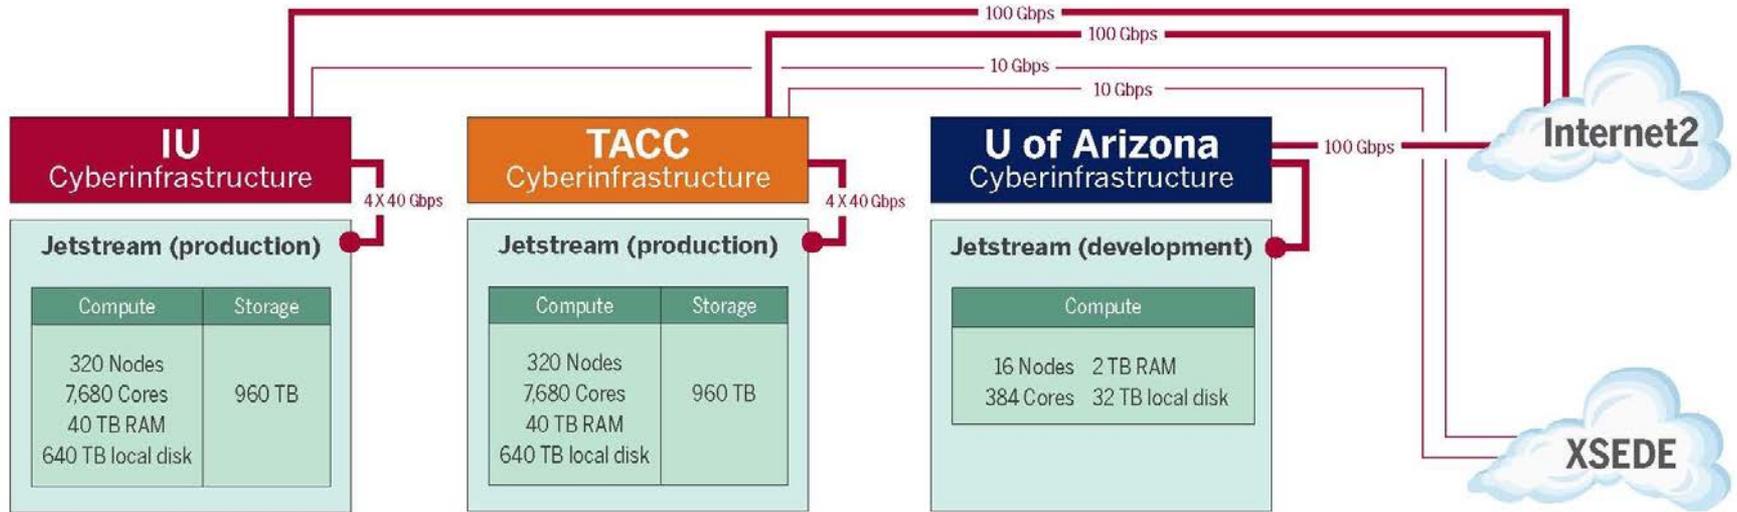

Jetstream & Jetstream2 Primary Investigator

Prepared for SC20 – November 2020 – Too much Virtual

The logo for Jetstream2, featuring the word "Jetstream2" in a bold, italicized, dark red font with a white outline. A red swoosh underline is positioned beneath the text.

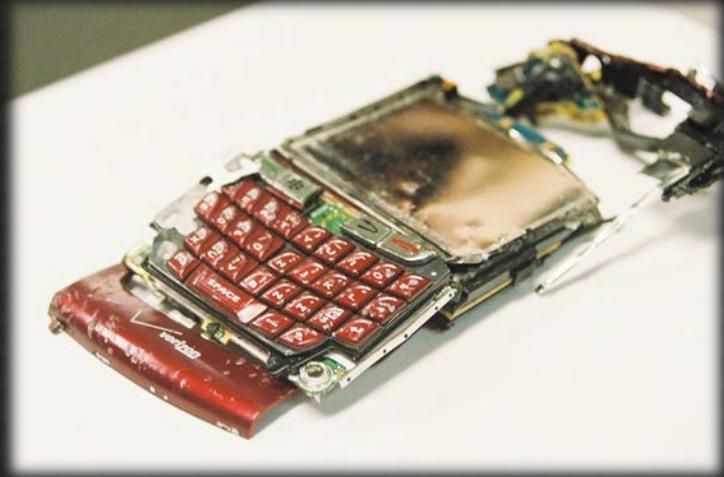

Jetstream2

Jetstream [1] System Overview

What worked?

- Allowing API access and full control (root privileges)
- “Indefinite workflows” – allowing instances to run continuously – providing PIs renew their allocations
- Development of trial allocations

Flickr user MattHurst – Broken Blackberry

What didn't work?

- Forcing small allocations into the research allocation process
- Lack of multi-year allocations
- Lack of shared data set storage

What is Jetstream2 and why does it exist?

- Significant evolution of the Jetstream cloud resource
- Under 10% NSF investment → support for 24% of institutions, 23% of active PIs, and 32% of users*
- Jetstream has provided **6x more** SUs than **any other** XSEDE resource for Education
- Emphasis on ease-of-use, broad accessibility, *AI for Everyone*
- Will provide **on-demand interactive** computing and persistent services for science gateways
- Enables *configurable* environments; *programmable cyberinfrastructure*

*Based on XDMoD data at Workload Analysis Report: <http://arxiv.org/abs/1801.04306>

Jetstream2 Capabilities

Enhancing IaaS model of Jetstream:

- Improved orchestration support
- Elastic “push button” virtual clusters
- Federated JupyterHubs

Commitment to **>99%** uptime

- Critical for science gateway hosting
- Hybrid-cloud support

Revamped User Interface

- Unified instance management
- Multi-instance launch

Feb 12, 2019 – Jet stream region called “Jet N6”
NASA/JPL-Caltech/SwRI/MSSS/Kevin M. Gill

- **>57K** cores of next-gen AMD EPYC processors
- **>360** NVIDIA A100 GPUs will provide vGPUs via NVIDIA’s MIG feature
- **>18PB** of storage (NVMe and disk hybrid)
- 100GbE Mellanox network

Conceptual Jetstream2 Architecture

Jetstream2

Platform Overview

Timeline

- Jetstream now in 5th year of operations
- Jetstream extension granted by the NSF through November 2021
- Jetstream2
 - Early operations planned for August 2021
 - Production operations by October 2021

Flickr user Oiluj Samall Zeid - Lejos de Yulín
